

Centrexion Therapeutics to Present Data on CNTX-4975 from the Treatment of Knee Osteoarthritis Pain at IX SIMPAR-ISURA

BOSTON, Mass., – March 23, 2017 – Centrexion Therapeutics, a company focused on advancing the treatment of chronic pain with one of the largest exclusively pain-focused pipelines of non-opioid therapies in active development, today announced it will present 12-week data from TRIUMPH, a Phase 2b clinical trial of CNTX-4975 for the treatment of moderate to severe knee pain associated with osteoarthritis, at the IX SIMPAR-ISURA (Study in Multidisciplinary Pain Research – International Symposium of Ultrasound for Regional Anesthesia and Pain Medicine) meeting taking place March 29 – April 1, 2017 in Florence, Italy.

Full abstracts are available online at <http://www.simpar-pain.com>. Details of the poster presentation are listed below. Additional data from the TRIUMPH study will be presented at medical meetings later this year.

Abstract Title (#41): CNTX-4975 Administration in Subjects With Knee Pain Associated With Osteoarthritis: 12-Week Results of a Randomized, Double-Blind, Placebo-Controlled, Phase 2b Study

Poster Viewing: Noon CET, March 30 – 4:00 p.m. CET, April 1, 2017

Poster Discussion: 4:00 – 4:30 p.m. CET, March 31, 2017

Location: Florence Congress Palace

About CNTX-4975

CNTX-4975 is based on Centrexion's proprietary STRATI® technology (**S**ynthetic **TR**ans **c**apsaicin **ul**Tra-pure **I**njection), a highly potent, ultrapure, synthetic form of trans-capsaicin (a medicine traditionally derived from the chili plant). CNTX-4975 is designed to be injected directly into the site of pain to provide rapid onset, large reduction and long duration of relief from moderate to severe pain without affecting touch sensibility or position sense.

CNTX-4975 works by selectively targeting the capsaicin receptor (TRPV1) to rapidly inactivate only the local pain fibers transmitting signals to the brain. With a short half-life, STRATI® is cleared from the body within 24 hours. This approach provides pain relief that can last for months until the ends of the local pain fibers regenerate, while maintaining normal sensation, such as touch, pressure and position, and without the risks of toxicities of NSAIDs and injected corticosteroids or the side effects, including abuse and addiction, associated with opioid treatments.

About Centrexion Therapeutics

Centrexion Therapeutics, Corp. is focused on advancing the treatment of chronic moderate to severe pain with one of the largest exclusively pain-focused pipelines of non-opioid, non-addictive therapies in active development. Centrexion Therapeutics recognizes the needs of over a quarter of a billion people living with chronic pain worldwide, and aims to develop new, safer and more effective therapies that overcome the limitations and challenges associated with current pain treatments. Founded by world-renowned leaders in drug development and well-funded by key investors,

Centrexion Therapeutics is building a pain treatment powerhouse to address the substantial and growing global chronic pain epidemic. Centrexion Therapeutics has recently relocated from Baltimore, Md. to Boston, Mass.
